

## Suckling Aid

### What is it for?

to support new-born animals and provide orphaned animals with liquid and food

### Product Information

- for small animal babies, e.g. small puppies and kittens, guinea pigs, rabbits, hamsters
- also for raising orphaned wild animals, e.g. hedgehogs, squirrels
- with 3 teats (can be sterilized)

### Please Note

- Orphaned animals need to be offered a milk substitute suitable for their species as soon as possible. To raise them adequately, look for a replacement mother at the same time.
- Let the animal suck of its own accord. Do not press the liquid into the animal's mouth as liquid can easily go the wrong way with baby animals.
