

## Bandages

### What are they for?

for wound care, e.g. on a paw

### Product Information

- protects from dirt and moisture
- for dogs and cats

### Please Note

- always cushion bandages on the paws sufficiently (as a minimum between toes and pads).
- Do not make the bandage too tight to allow free blood circulation. In the case of swelling above or below the bandage, immediately loosen or remove the bandage. If the swelling does not subside, please see a veterinarian.
